INTRODUCTION

DATA COLLECTION and SOURCE:

The data contained in this report is taken from the York University Security Services Computer Information Systems. These systems are as follows:

- Resolver (Formerly PPM2000) – PERSPECTIVE INCIDENT MANAGEMENT SYSTEM
- Resolver (Formerly PPM2000) – DISPATCH LOG

It should be noted that as the above systems are being updated continuously during the course of an investigation into an incident, changes to statistics in previous reports are common and expected.

COLLECTION OF SEXUAL VIOLENCE STATISTICS:

Please note that the reported sexual violence statistics only represent incidents reported to York Security Services. These statistics do not reflect cases reported in confidence to the Sexual Violence Response Office (SVRO). As of September 2016, survivors have the option of reporting cases to the SVRO. Notification to police is only done at the direction of the survivor unless there is an imminent threat to community safety. SVRO is the lead intake and coordinating office for sexual violence reports. Accordingly, SVRO maintains their own statistics. Survivors still have the option of reporting to York Security Services, Community Safety Department, if they wish in addition to reporting to SVRO.
